Introduction

Here is an itemised list:

- The first item.
- The second item.
- The third item.

A Diagram

Here is a diagram:

Fundamental Theorem of Calculus

If f is continuous on the closed interval [a, b] and F is the indefinite integral of f on [a, b], then

$$\int_{a}^{b} f(x) \, \mathrm{d}x = F(b) - F(a). \tag{1}$$

Conclusion

This is a great poster format!

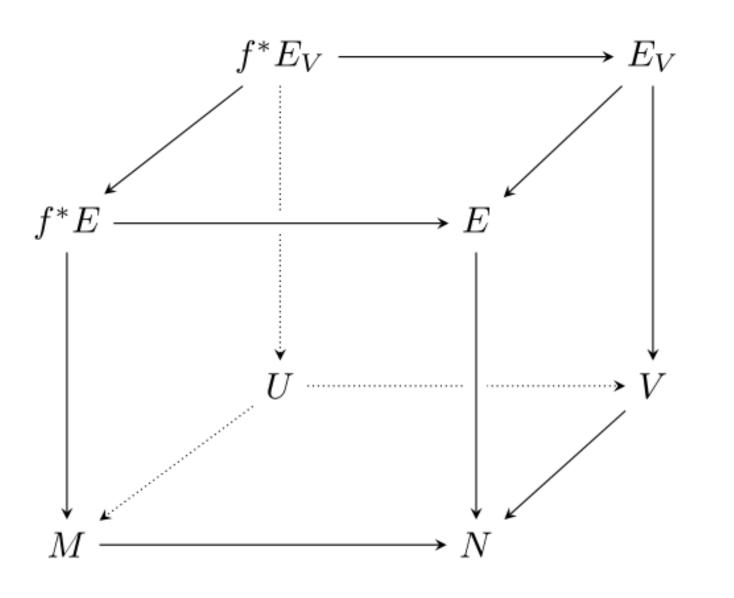

Imperial College London

Main finding goes here,
translated into plain English.
Emphasize the important words.
